Get better connected with PuttyConnect™

- **Connect your enterprises**

  PuttyConnect™ can be fully integrated with the PuttyHealth™ suite of e-health solutions, including PuttyEnterprise™.

- **Confer with colleagues**

  Talk with peers across your Enterprise securely and in real time.

- **Get mobile**

  Take your communications on the road with safe & secure web access.

- **Speak with confidence**

  PuttyConnect™ uses the ultimate in encryption for the most secure communications experience for sensitive environments.

- **Track your telecommunications**

  Stay above board with fully auditable communications records.

What our clients have said about the world of Putty™

"Teleconferencing is simple, safe and secure. This means I can provide specialist medical services to any patient across the country and especially in rural and remote areas."

- Dr J Myers, Specialist Physician & Head of Geriatrics Sydney, Australia.

"I love using my iPad, iPhone and MacBook laptops and PuttyHealth™ works perfectly with all of these systems. My offices are installed with PCs and Linux and again PuttyHealth™ is fully integrated and functional on all platforms."

- Dr Carrington, ACT, Australia

We'd love to hear from you!

PuttyConnect™

Connect, communicate, and create.

A keystone in the PuttyHealth™ architecture.

PuttyConnect™—private & secure

Medical practice requires the utmost in privacy and security, and this need has never been so urgent since the advent of digital, networked data technologies. At Claydata®, we've hit upon a hybrid solution for the management of sensitive data that combines the best of both site-specific server technology and the latest in cloud-sourced sharing.

Our promise: to enact the most stringent privacy and security measures without sacrificing simplicity, flexibility, and accessibility.

PuttyConnect™ implements a Virtual Private Network (VPN) coupled with high-level Secure Sockets Layer (SSL) security protocols: military-grade encryption.

PuttyConnect™, secure, safe and:

- Certified to US industry standard by the Drummond Group ONC-ATCB.

- Fully compliant with interoperability protocols such as HL7.

- Managed according to strictly administered security permissions.

Get connected & take advantage of these simple & secure communications solutions.

- Telemedicine

  Opens up incredible possibilities for telemedicine. Contact us or visit our website for more details on this important aspect of PuttyConnect™.

- VoIP

  Save on telephone bills, keep track of your contacts and record calls, set your availability and more.

- Chat

  Discreet and real-time instant messaging.

- SMS

  A popular way to implement alerts (booking notifications, and more).

- Secure file transfer

  Documents, images, video, DICOM.

All of these aspects of PuttyConnect™ function across your system—desktop, mobile, tablet, however you like to connect.

PuttyConnect™—it's about connectivity

PuttyConnect™ is designed to be as simple and accessible as possible.

With PuttyConnect™ you can:

- Connect across multiple channels

  Use chat, VoIP, video-conferencing, file transfer, TXT messaging and more.

- Collaborate with colleagues

  Communicate within your enterprise or with external parties with ease.

- Connect with confidence

  Communicate safe in the knowledge that PuttyConnect™ uses high-powered encryption across the board.

- Connect the dots

  PuttyConnect™ is designed to work seamlessly with other PuttyHealth™ products.
