What our clients have said about the world of Putty®

"Teleconferencing is simple, safe and secure. This means I can provide specialist medical services to any patient across the country and especially in rural and remote areas."

- Dr J Myers, Specialist Physician & Head of Geriatrics Sydney, Australia.

"I love using my iPad, iPhone and MacBook laptops and Putty-Health™ works perfectly with all of these systems. My offices are installed with PCs and Linux and again PuttyHealth™ is fully integrated and functional on all platforms."

- Dr Carrington, ACT, Australia

We'd love to hear from you!

Putty® Gateways

Bridging doctors, patients, and e-health systems.

Putty® Gateways— private & secure

Medical practice requires the utmost in privacy and security, and this need has never been so urgent since the advent of digital, networked data technologies. At Claydata®, we've hit upon a hybrid solution for the management of sensitive data that combines the best of both site-specific server technology and the latest in cloud-sourced sharing.

We make sure all our Gateway providers uphold the same values of security and safety.

Our promise: to enact the most stringent privacy and security measures without sacrificing simplicity, flexibility, and accessibility.

Putty® Gateways, secure, safe and:

- Certified to US industry standard by the Drummond Group ONC-ATCB.

- Fully compliant with interoperability protocols such as HL7.

- Managed according to strictly administered security permissions.

If you've built a strong enterprise, you know the value of keeping a sharp eye on the ground. Let our Gateways help you take advantage of affiliate services and see your enterprise grow in new directions.

- **PuttyPay**

    PuttyPay is a gateway that provides a bridge between medical service providers and billing recyclers. This gateway allows medical providers to take advantage of billing recyclers to facilitate online Medicare billing, private billing, and more.

- **PuttyData**

    PuttyData is a gateway that provides a bridge allowing medical providers to exchange their deidentified data with medical researchers or medical research organisations.

- **PuttyPath**

    This gateway acts as a bridge between general and specialist medical healthcare providers and pathology providers. Laboratories and medical providers can send and receive requests and results electronically, safely, and securely.

- **PuttyPACS**

    This gateway provides a bridge linking medical providers to radiology and diagnostic imaging services. Gain access to radiology services and send and receive diagnostic data (such as DICOM data) via a PACS (Picture Archive Communication Server) system.

Putty® Gateways— opening doors into the world of e-health

With Putty® Gateways you can:

- Take advantage affiliate services that will take the work out of many aspects of managing a busy enterprise.

- Open up new sources of revenue.

- Enjoy simplicity—always at the core of a Gateway service.
